Definitions

Benefit Period

The term Medicare Part A Benefit Period means a period of time during which a Medicare beneficiary is Hospital or Skilled Nursing Facility confined. A Medicare Benefit Period: begins when a Medicare beneficiary is admitted to a Hospital as an inpatient; and ends when he or she has not been Confined in a Hospital or Skilled Nursing Facility for 60 consecutive days. If you go into a hospital or a skilled nursing facility after one benefit period has ended, a new benefit period begins.

Coinsurance

The term Coinsurance means the percentage of charges for Covered Expenses that an insured person is required to pay under the plan.

Copay/Benefit Deductible

A fixed charge for specific services like doctor visits. You may be responsible to pay all or a portion of this charge.

Deductible

The amount you must pay before the plan begins to reimburse for covered expenses.

Durable Medical Equipment

Medicare Part B (Medical Insurance) covers Medically necessary durable medical equipment (DME) if your doctor prescribes it for use in your home.

Medicare pays for different kinds of DME in different ways. Depending on the type of equipment:

- You may need to rent the equipment.
- You may need to buy the equipment.
- You may be able to choose whether to rent or buy the equipment.

Medicare will only cover DME if your doctors and DME suppliers are enrolled in Medicare. Doctors and suppliers have to meet strict standards to enroll and stay enrolled in Medicare. If your doctors or suppliers aren't enrolled, Medicare won't pay the claims submitted by them. You can visit <https://www.medicare.gov/supplierdirectory/search.html> to find a supplier that is enrolled in Medicare.

Lifetime Reserve Days

In Original Medicare, these are additional days that Medicare will pay for when you are in a hospital for more than 90 days. You have a total of 60 reserve days that can be used during your lifetime. For each lifetime reserve day, Medicare pays all covered costs except for a daily coinsurance.

Limiting Charge

In Original Medicare, the highest amount of money you can be charged for a covered service by doctors and other health care suppliers who don't accept assignment. The limiting charge is 15% over Medicare's Allowable Amount.

Maximum Reimbursable Charge (MRC)

When you receive care for services not covered by Medicare but covered under your plan, there's a limit to the amount of money that will be reimbursed. This amount is called the maximum reimbursable charge. When determining maximum reimbursable charge, Cigna considers the service fees charged by doctors and other health care professionals in your area. We also look at similar data provided by most other major U.S. health service companies.

Note: The provider may bill you for the difference between the provider's normal charge and the Maximum Reimbursable Charge, in addition to any applicable deductibles and coinsurance.

Medically Necessary

Services or supplies that are needed for the diagnosis or treatment of your medical condition and meet accepted standards of medical practice.

Medicare Approved Amount

In Original Medicare, this is the amount a doctor or supplier that accepts assignment can be paid. It includes what Medicare pays and any deductible, coinsurance, or copayment that you pay. It may be less than the actual amount a doctor or supplier charges.

Out-of-Pocket

Out-of-Pocket Expenses are Covered Expenses incurred for charges that are not paid by the benefit plan because of any Part A

A or Part B expenses for:

- Coinsurance

When the Out-of-Pocket Maximum is reached, Injury and Sickness benefits are payable at 100%.

Part B Prescription Drugs

Includes but not limited to: Drugs used with an item of durable medical equipment (DME) like an infusion pump and nebulizer, some antigens, injectable osteoporosis drugs, erythropoiesis-stimulating agents by injection if you have End-Stage Renal Disease (ESRD) or you need this drug to treat anemia related to certain other conditions, blood clotting factors you give yourself by injection if you have hemophilia, injectable and infused drugs when given by a licensed medical provider, and oral ESRD drugs if the same drug is available in injectable form and the drug is covered under the Part B ESRD benefit.

Preventive Services

Health care to prevent illness or detect illness at an early stage, when treatment is likely to work best. Includes: Abdominal aortic aneurysm screening, alcohol misuse screenings & counseling, bone mass measurement, breast cancer screening (mammogram), cardiovascular disease screenings & behavioral therapy, cervical and vaginal cancer screening, cognitive assessment & care plan services, colorectal cancer screenings (barium enema screening, colonoscopies, fecal occult blood tests, flexible sigmoidoscopies, stool DNA test), blood-based biomarker test, depression screenings, diabetes screenings, diabetes self-management training, diabetes prevention program, hepatitis B virus screenings, hepatitis C screening, HIV Screening, lung cancer screening, kidney disease education services, nutrition therapy services, obesity screenings & counseling, prostate cancer screening, sexually transmitted infections screening & counseling, and tobacco use cessation counseling, vaccines such as COVID-19, flu, pneumococcal, and Hepatitis B, one "Welcome to Medicare" preventive visit, and a yearly "wellness" exam (this is not a physical exam).

Semi-Private Room

A hospital room shared by you and one other person.
